

Job Opportunity: Consulting Position

Informa Economics is a well-established consulting firm focused in the areas of food, agribusiness, transportation and energy. For more information, please refer to www.informaecon.com.

The Position:

The position will include the following responsibilities:

- Conduct extensive primary and secondary market research of food, agricultural, or renewable energy sectors worldwide.
- Manage, organize, and analyze large sets of data using Excel or Access.
- Develop questionnaires and conduct high-level interviews with industry participants.
- Analyze market and price trends using statistical/econometric and business tools.
- Develop financial statements that support a feasibility study or business plan.
- Summarize market research and analysis into reports.

This position has potential for future advancement into project management, client service and sales.

The Requirements and Qualifications:

- Masters, MBA or PhD in business, economics, agricultural economics or a related field. Candidates with practical experience and an undergraduate degree will be considered.
- Academic background will include some combination of economics, agricultural economics, econometrics, business, statistics, finance, futures/options or accounting.
- Familiarity with the food, agricultural or renewable energy sectors and/or practical work experience is desired but not required.
- Proficiency in Excel, Word and PowerPoint is required, and experience with GIS applications such as MapInfo is a plus, but not required.
- Strong communication skills including writing and oral presentation capabilities.

For consideration, qualified, highly-motivated and analytically-minded candidates are invited to e-mail a cover letter and resume to: careers@informaecon.com and please indicate "Consulting Position" in the e-mail subject line.

We are an EEO employer.
