

- FIP translates futures prices into prices for items that have no futures
- Facilitates forward pricing for commodities with no futures contract.
- Combines regression models built on historical data with real-time futures quotes.
- Provides essential information for those looking to perform cross-hedges.
- Facilitates Composite Pricing and Composite Hedging.
- Available via Internet 24/7.
- Sellers can use FIP to set forward offers
- Buyers can use FIP to evaluate reasonable-ness of forward offers
- Presents an independent “forward view” on the market
- FIP model can calculate either monthly or weekly data.
- Gives a forward view on the price of a basket of feed ingredients
- Shows Historical Cash Price Charts

**Available
via
Internet
24/7!**

The collage displays several key features of the Informa Futures Implied Pricing platform:

- Two-Year Price History:** A line chart showing the price of Corn Gluten Feed-Chicago from October 2006 to November 2006.
- Commodity Menu:** A hierarchical list of feed ingredients with their respective location counts, such as Grain Co-Products (25 Locations), Protein Meals (22 Locations), and Feed Fats (13 Locations).
- Futures Implied Pricing Table:** A table providing statistical data for the Corn Gluten Feed-Chicago market, including R Square, Hedge Ratio, and 25%, 50%, and 75% levels.
- Futures FIP Scatter Chart:** A scatter plot showing the relationship between Nearby Futures Price and Corn Gluten Feed-Chicago prices for the month of April.
- Composite Editing Page:** A page for creating and editing feed rations, showing a list of ingredients like Ruminant Meat & Bone Meal-Illinois and Feather Meal-Midsouth with their respective percentages.

How can this service be accessed?

- **This website is available to Feed Ingredient Daily (FID) Subscribers**
- Primary FID subscribers will be able to have access to one of the **four ingredient categories** of their choice:
 - Animal Proteins (AP)
