

- FIP translates futures prices into prices for items that have no futures
- Facilitates forward pricing for commodities with no futures contract.
- Combines regression models built on historical data with real-time futures quotes.
- Provides essential information for those looking to perform cross-hedges.
- Facilitates Composite Pricing and Composite Hedging.
- Available via Internet 24/7.
- Sellers can use FIP to set forward offers
- Buyers can use FIP to evaluate reasonable-ness of forward offers
- Presents an independent “forward view” on the market
- FIP model can calculate either monthly or weekly data.
- Gives a forward view on the price of a basket of feed ingredients
- Shows Historical Cash Price Charts

**Available  
via  
Internet  
24/7!**

# Introducing Futures Implied Prices (FIP) for Feed Ingredients

The collage displays several key features of the Informa Economics platform:

- Commodity Menu:** A hierarchical list of feed ingredients such as Grain Co-Products (25 Locations), Protein Meals (22 Locations), Animal Proteins (26 Locations), and Feed Fats (13 Locations).
- Two-Year Price History:** A line chart titled "Two-Year Price History" for "Corn Gluten Feed-Chicago" showing price fluctuations from October 2006 to November 2006.
- Futures Implied Pricing Table:** A table for "Corn Gluten Feed-Chicago" with columns for Month, R Square, Hedge Ratio, 25% Level, 50% Level, 75% Level, and Number Years.
- Futures FIP Scatter Chart:** A scatter plot titled "Futures Implied Pricing" for "Corn Gluten Feed-Chicago" in April, plotting "Corn Gluten Feed-Chicago" price against "Nearby Futures Price".
- Composite Editing Page:** A page for editing a feed composite, showing a list of ingredients like "Ruminant Meat & Bone Meal-Illinois" and "Feather Meal-Midsouth" with their respective percentages.

## How can this service be accessed?

- **This website is available to Feed Ingredient Daily (FID) Subscribers**
- Primary FID subscribers will be able to have access to one of the **four ingredient categories** of their choice:
  - Animal Proteins (AP)
  - Feed Fats (FF)
  - Grain Co-Products (GC)
  - Protein meals (PM)
  - Composite (CP) for use with at least one category.
- **The annual subscription price of the FID includes one category.**
- **The annual subscription price at renewal will be \$895** for the primary subscriber and for an additional fee other categories and groups can be added.
- To become more familiar with the website and its features, you can request a one-week trial period.
